

ABC's and 123's

Keyboarding Strategies for E.O.

Why teach keyboarding?

- NETS and MA State Standards set the goal...
- We all use computers and...
- Keyboard is still the primary input device for computers.

NETS Standards

Technology productivity tools

- Students use technology tools to communicate, enhance learning, increase productivity, and promote creativity.
- Students use productivity tools to collaborate in constructing knowledge, solve real-world problems, prepare problem sets, produce other creative works, and communicate.

NETS keyboarding details

- Keyboarding input must meet 4 key criteria
 - *The words, signs, symbols, lines, letters, etc. to type should be simple.
 - *Structure "handwriting" or "keyboarding"
 - *Computer program use is simple (e.g., Spelling, Grammar, etc.) The device, keyboard, mouse, keys, sign, etc. are all simple, clear, and easy to use.
 - *The device and/or keyboard is simple to use.
 - *The documents created are simple.

When should we begin?

- When kids begin to use computers?
- When kids are "ready"?
- When they reach middle school?
- When they reach high school?

How should we teach this?

- Read and Pech
- Handwriting
- "Touch Typing" method
- Keyboarding as "input"

Industrial Age vs Information Age

output vs input
touch typing vs keyboarding

Who should teach keyboarding?

1. Distance education
2. Classroom teachers
3. Computer specialists
4. Parents
5. Self-paced student directed
6. All of the above

Where should we learn keyboarding?

1. School
2. Computer Lab
3. Classroom
4. Home
5. All of the above
6. None of the above

Main Methods

- Textbooks
- Software
- Online
- Diana Hanbury King Method

Textbooks

- Repeat examples
- Copy from text to screen
- Finger oriented

Strengths of Software

- They all work
- They have "game like" interfaces
- They make practice fun
- 30 +/- lessons - small steps
- They are visual
- Some are also auditory

Weaknesses of texts and software

- Must "reach" to learn to keyboard
- Need "established eye" of teacher or parent - to avoid bad habits of looking at fingers and incorrect fingering
- Barriers - necessary for software?
- Keyboard blocks - helpful?

Online

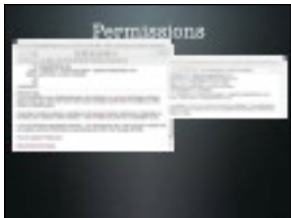

- output and input
- copy from screen
- finger extended
- 1 for more letters

Deans King Method Alphabet Poem

- alphabet, hand oriented (not finger)
- multi-sensory many learning style
- 2-4 letters whole keyboard - intermediate
- get to handwriting stage in days - hours
- framework / scaffold, custom screen
- more output oriented
 - response
 - words
 - lines
